COMPANY PRESENTATION

INTER CERT, apart from the inspection and certification services according to ISO 9001, 22000, 14001 and OHSAS 18001, also provides specialized product certification services for the acquisition of the CE and marks of conformity (e.g. TUV) within the framework of the European directives and standards.

Our company, with a technical personnel that is active for over 20 years in the certification area, undertakes all the required certification actions, depending on the category of product compliance and more specifically:

- Pre-audits of products in accordance with the applicable European standards
- Laboratory checks of the products
- Audit of the production facility (FPC)
- Issue of certificate and entitlement to apply the mark on the product
- Monitoring of the production facility on a regular basis

INTER CERT offers audit services and product certification services according to the New Approach Directives for the affixation of the CE mark. Apart from the CE compliance certification process, which means that the product complies only with the essential requirements of the relevant Directive (i.e. the minimum safety standards requirements which must be met by a product), our company offers quality control and certification services of products in order to affix marks of conformity on the products.

Moreover, for manufacturers whose products carry the "TÜV" safety label, there is legal assurance towards the strictest civil liability law of the European Union concerning damages caused by defective products towards third parties.
